Diagnosis:	

Please indicate which group the child or young person fits into:

Does the child/young person you are referring meet the Rainbows criteria?

Yes

No

Group 1

Life-limiting condition for which curative treatment may be feasible, but can fail
Eg, cancer, organ failure

Patients with poor prognosis or where treatment has failed/failing
during an acute episode

Note: On reaching long-term remission or following a successful curative treatment, the child/young person will be discharged

Group 2

Condition where premature death is inevitable, and likely before the age of 25

Group 3

Progressive condition without curative treatment options, likely to die before the age of 25

Group 4

Irreversible but non-progressive conditions causing severe disability leading to susceptibility to health complications and likelihood of death in the next 2 years

Group 4 - Further Information

Do they have seizures?

Yes No

Are seizures life threatening? The risk of SUDEP is not sufficient to meet this criterion

Yes No

Are seizures poorly controlled requiring frequent hospital admission

Yes No

Is the seizure disorder progressive, with or without syndrome diagnosis

Yes No

Are seizures the result of a life-limiting condition

Yes No

Is their disability associated with any of the following?

Yes No

A vulnerable airway

Yes No

Apnoea's requiring action

Yes No

Scoliosis compromising respiratory function

Yes No

> 2 chest infections requiring hospital admission per year

Yes No

An ongoing need for oxygen therapy or ventilatory support

Yes No

Escalating medical intervention

Yes No

Gut failure

Yes No

Instability of brainstem function (temperature, circulation or breathing)

Yes No

Comments and further information

Potential of death discussion summary

If you have been unable to discuss the potential of death with the family please explain why?

Is there a Respect/Advance care plan in place?

Yes

No
